**SUPPLEMENTARY INFORMATION:** The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) is this collection necessary to

the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

*Abstract:* The International Early Learning Study (IELS), scheduled to be conducted in 2018, is a new study sponsored by the Organization for Economic Cooperation and Development (OECD), an intergovernmental organization of industrialized countries. In the United States, the IELS is conducted by the National Center for Education Statistics (NCES). The IELS focuses on young children and their cognitive and non-cognitive skills and competencies as they transition to primary school. The IELS is designed to examine: children's early learning and development in a broad range of domains, including social and cognitive skills; the relationship between children's early learning and children's participation in early childhood education and care (ECEC); the role of contextual factors, including children's individual characteristics and their home backgrounds and experiences, in promoting young children's growth and development; and how early learning varies across and within countries prior to beginning, or in the early stages of primary school. In 2018, in the participating countries, including the United States, the IELS will assess nationally-representative samples of 5-year-old children enrolled in public and private schools that offer kindergarten in the United States through direct and indirect measures, and will collect contextual data about their home learning environments, ECEC histories, and demographic characteristics. The IELS will measure young children's knowledge, skills, and competencies in both cognitive and non-cognitive domains, including language and literacy, mathematics and numeracy, executive function/self-regulation, and social emotional skills. This assessment will take place as children are transitioning to primary school and will provide data on how U.S. children entering kindergarten compare with their international peers on skills deemed important for later success. To prepare for the main study that will take place in October-November 2018, the IELS countries will conduct a field test in the fall of 2017 to evaluate newly developed assessment instruments and questionnaires and to test the study operations. The U.S. IELS field test data collection will occur from November to December, 2017, with respondent recruitment beginning in early September 2017. Recruitment activities for the 2017 field test were approved in April 2017 (OMB 1850-0936 v.1-2). This request is to conduct 2017 IELS field test data collection as well as recruitment for the IELS 2018 main study.
